# World of Xeen

## Installation

The World of Xeen requires 20,000,000 bytes of disk space. If you already have Clouds of Xeen installed, you will only need 20,000,000 bytes of disk space. Make certain that at least this much is available before you install World of Xeen.

### "Already have Clouds of Xeen on my computer"

If you have Clouds of Xeen installed, you should follow the instructions on the reference card and install Darkside of Xeen into the same directory as Clouds of Xeen (i.e. C:\XEN). This will automatically create the World of Xeen.

### "Already have Darkside of Xeen on my computer"

or

### "I don't have either game on my computer"

If you are installing both games for the first time or if you have Darkside of Xeen already installed, insert Darkside of Xeen disk 1 into your drive and type INSTALL to run the Darkside of Xeen install program (i.e. INSTALL). Choose the "Create the World of Xeen" option and follow the on screen prompts. Follow the directions and the World of Xeen will automatically be created.

### "Already have both games on my computer, but in different directories"

If you have already installed both games, but in different directories, copy the XEN.CC file and your save games files (.JFF) from the Clouds of Xeen directory into your Darkside of Xeen directory.

## Getting started with the World of Xeen

After you complete the installation of the World of Xeen, just type "XEN" to begin the game. When the World of Xeen title screen appears, press "Load A Game" to use your old characters, or "Start New Game" to begin the World anew. Once you enter the World, you will find that the Moons are aligned and that any Pyramid, such as the one just outside Writga, will transport you in and from the Darkside.

If there are any errors, the help program will assist you. If you have any questions, write to: Jonathan Ward, c/o Electronic Games, c/o The First Star Software, 14000 N. 19th Ave., Aurora, Colorado 80010.
